**INAUGURAL
SCHWARZMAN-RHODES
SYMPOSIUM
26-28 OCTOBER 2018**

Dear Schwarzman Scholars and Rhodes Scholars,

Welcome to our inaugural Symposium on Public Leadership. This weekend will provide all of us with opportunities for intellectual engagement, civic dialogue, skills development and bridge building between our two programmes. We are delighted to have each other as partners as we explore a vitally important topic which has a profound impact on our lives and societies in the 21st century.

The founding mission of both the Rhodes Scholarships and the Schwarzman Scholars programme is what brings us together: a shared commitment to developing leaders who will work – across many different sectors – towards positive change in the world.

The long and rich history of the Rhodes Trust helped inspire the creation and development of Schwarzman Scholars. Founding Trustee Steve Schwarzman is grateful for the opportunity to learn from the Rhodes Scholarship and invested in our ongoing collaboration. The Rhodes Trust also continues to evolve, seeking to further expand its geographic constituencies, diversify its cohort, and build a network for global impact. Both programmes are committed to enhancing alumni engagement in order to foster lifelong fellowship and promote a truly global conversation about the vital issues of our time.

This weekend's symposium will address topics and issues of great importance in the development of public leaders: ethical leadership, intercultural understanding, continuous learning, communications expertise and networking. We will have the chance to hear from outstanding speakers, including many from the Rhodes Alumni family, who will share their own stories and insights. They will be an inspiration to us all.

We encourage your active participation and hope that you will use what you learn this weekend and share it widely. We are counting on you to lead not just in the future, but today as well. It is never too early to start!

Enjoy the weekend,

Amy Stursberg

SCHWARZMAN SCHOLARS

“The world today needs leaders who are first and foremost educated, who believe in their country, who believe they can make it a better world by making each of their countries a better place. And I think that the Schwarzman Scholars Program will help in that process. Understanding China is critically important because of the role that China plays today on the international stage. Young people talking to each other will help that insight. I think it will be an example for the rest of the world of how we have to educate our young people and make sure we are finding ways to cooperate and not separate.”

COLIN POWELL

65TH UNITED STATES SECRETARY OF STATE

THE MISSION

With China set to become the world’s largest economy in the coming decades, its rise as a global economic powerhouse presents new challenges and opportunities. Navigated incorrectly, relationships with China can lead to increased tensions and instability.

It will be up to a new generation to overcome differences and lead with confidence and sensitivity. Schwarzman Scholars is designed to provide future leaders with first-hand exposure to China and relationships with its people, with the hopes of fostering greater cooperation between China and the rest of the world for decades to come.

THE PROGRAM

Modeled after the Rhodes Scholarship – which was founded in 1902 to promote international understanding and peace among the preeminent global powers of the day – Schwarzman Scholars is oriented

to meet the challenges of the 21st century and beyond. The program was designed to help future leaders in business, public service, science, technology, engineering, law and the non-profit space better understand China and prepare for constructive engagement.

The program supports up to 200 scholars annually from the U.S., China and around the world for a one-year Master's Degree program at Tsinghua University in Beijing, one of China's most prestigious universities.

Scholars chosen for this highly selective program live in Beijing for a year of study and cultural immersion, attending lectures, traveling, and developing a better understanding of China. Scholars reside at Schwarzman College, a residential college constructed for the program at Tsinghua University, modeled on the residential colleges at Harvard, Yale, Oxford and Cambridge.

Having raised \$578m to date, Schwarzman Scholars is the single biggest philanthropic effort in China's history, funded largely by international donors.

STEPHEN A. SCHWARZMAN

Chairman, CEO and Co-Founder of US asset management firm, Blackstone, and philanthropist, Schwarzman personally contributed \$100 million to the program and is leading a fundraising campaign to raise an additional \$500 million from private sources to endow the program in perpetuity.

Mr. Schwarzman's hands-on involvement with every aspect of the program's development is based on his passion for the program and its mission.

SCHWARZMAN SCHOLARS

"In the 21st century, China is no longer an elective course."

STEPHEN A. SCHWARZMAN

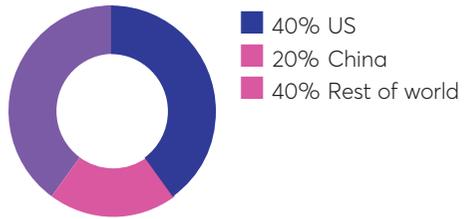

ALUMNI MISSION STATEMENT

Schwarzman Scholars Alumni are global citizens committed to deepening understanding between China and the rest of the world. As a community, we help build and strengthen our network to leverage the power of our education, our friendships, and our passion for creating positive change. We always seek knowledge to enhance our understanding of global affairs and maintain our focus on China and its rise on the world stage. We aim to be people of consequence, thought leaders in our fields, ambassadors and problem solvers. We continue our study of and interaction with leaders from diverse places, industries and experiences to learn from their successes and failures. We develop as leaders, too, by understanding our own responsibility to support the Schwarzman Scholars mission and to give back to our communities and to each other.

THE RHODES TRUST

THE MISSION

The Rhodes Trust administers the Rhodes Scholarships and two other innovative fellowship partnerships. Our mission is to identify and develop leaders to achieve public good. We bring together a graduate community of remarkable young people from all over the world, in all fields of study, who are impatient with the way things are and have the courage to act. The criteria for the election of Scholars remain the cornerstone of our selection process: outstanding intellect, character, leadership, and commitment to service.

The selection process is entirely volunteer driven, led by a National Secretary and Committees composed of Scholars and distinguished community leaders. Each year, a class of one hundred Scholars is selected globally.

While at Oxford, Scholars enjoy our comprehensive Character, Service & Leadership Programme. Our unique programmes, retreats, conferences, skills workshops and speaker series at Rhodes House encourage Scholars to challenge each other's thinking, share diverse viewpoints and generate new ideas.

Our commitment to Scholars extends beyond graduation, in pursuit of genuine lifelong fellowship. Scholars become part of a five thousand-strong intergenerational network and are supported throughout their lives with opportunities to connect and collaborate to fight the world's fights.

OUR RHODES FORUMS

Our Global Forums bring together deeply engaged individuals from around the world, across all fields of expertise and at all stages of their careers. By holding events in Oxford and around the world, we create global hubs for the exchange of opinions and ideas. Having the space and freedom to openly debate, discuss, question and challenge is crucial to finding solutions for society's biggest questions.

"The Rhodes Trust, based at the University of Oxford, brings together and develops exceptional people from all over the world, and in all fields of study, who are impatient with the way things are and have the courage to act."
